

Hospital Services Limited

Today's healthcare organisations face complex challenges

Connecting patients and providers shouldn't be one of them.

With the complete solution from HSL, you can give your patients the care they need, **when they need it.**

In fact, virtual visits have been shown to increase patient satisfaction, improve quality of care, and reduce treatment costs for hospitals and healthcare organisations.

Pexip Health lets patients easily join video meetings from the device of their choice, without the need to download any software or plugins. Providers can also join using the technology they already have, such as telehealth carts, video conferencing systems, Skype for Business, Microsoft Teams, or Google Hangouts Meet. No new workflows to learn.

Simple for patients

Give patients a seamless experience that puts their care at the forefront. With Pexip Health, patients can meet their caregivers from the comfort of their homes, using the devices they already own.

Join video consultations using any device including mobile, desktop app, or web browser.

No downloads or plugins required - simply click to join, easy.

Connect from anywhere, at any time, eliminating the need for travel.

Easy for providers

Caregivers can use the technologies they already own to meet with patients. There's no need to buy additional hardware, and the video platform integrates with existing workflows and tools so it fits seamlessly into daily schedules.

Use telehealth carts or video conferencing systems from Polycom, Cisco, and others to join video meetings.

Schedule meetings quickly with the tools you already use.

Native interoperability with Microsoft Teams, Skype for Business, and Google Meet.

Flexible APIs to integrate with EMRs/EHRs.

Why choose HSL and Pexip?

Pexip Health lets patients easily join video meetings from the device of their choice, without the need to download any software or plugins. Providers can also join using the technology they already have, such as telehealth carts, video conferencing systems, Skype for Business, Microsoft Teams, or Google Hangouts Meet.

Fully Customisable

Customise your telehealth platform with branding and workflows to maintain a consistent user experience from the doctor's office to the patient's home, and manage it all using a single, secure interface.

Meet With Anyone

Use the same video platform to communicate with others inside and outside your organization. Whether consulting with specialists from the hospital room, or joining a weekly department meeting, you can easily connect with others from any location and device.

Robust IT Admin Experience

Keep control over your entire experience and manage the platform in the way you want. Pexip Health is designed to be scalable and makes it easy for you to manage, today and in the future.

Collaboration Made Easy

Invited to a meeting hosted on a different collaboration service? No problem. We can get you into the meeting so you don't miss a thing.

Significantly improved the timeliness and ease of connecting with patients.

Why our clients choose Pexip...

AI Technology Powering Meetings

Innovative AI is behind the new Pexip Health meeting experience with automated optimisation for premium, video-first enterprise collaboration.

Google Hangouts Meet interoperability

The Pexip Health Google Meet interoperability solution allows third-party video conferencing devices and systems to natively join Meet calls.

One-Touch Join

Simplify your meeting room experience. Create a single, seamless joining workflow for any professional video meeting.

Video Meeting & Calling Platform

The Pexip Health video meeting and calling platform lets organisations simplify dynamic video collaboration at scale by making it possible to schedule and host meetings instantly on any device.

CVI Interop

When joining a Teams meeting from a third-party endpoint, everyone benefits from the full Teams experience with HD video, audio, and content sharing.

Fully Customisable

Comprehensive RESTful APIs allow for deep and advanced integrations with numerous other services while inbuilt branding features allows organisations to make it their service, not ours.

Why our clients choose Pexip...

Commenting on the advancements and importance of the Telehealth videoconferencing system in daily care and during Covid-19, Dr Brian McCrossan, Paediatric Cardiologist at Clark Clinic said...

"Since its introduction in 2007, there have been incremental improvements in the video conferencing technology. As the platform has advanced, it has significantly improved the timeliness and ease of connecting with patients and the paediatric cardiology team. It is extremely reliable and easy to access. We are also reassured by the security of the platform compared to social media type platforms.

“

Significantly improved the timeliness and ease of connecting with patients.

"Telehealth has played a vital role during the Coronavirus pandemic as it has enabled our team to conduct a number of urgent video-consultations for patients at home which have obviated the need for them to come to the emergency department. Parental anxiety has been more heightened than usual due to the pandemic, therefore we have found that supporting families at home with regular video-consultations has helped to reduce stress, reduce health service utilisation and is much appreciated by parents and clinicians alike."

Dr Brian McCrossan

Commenting on this exciting step in stroke care, consultant stroke physicians Dr Enda Kerr and Dr Michael McCormick said...

"We are impressed by the simplicity and elegance of the solution that was presented to us by HSL. Being able to intervene, support our colleagues and conduct remote consultations with the patient from a tablet or phone has changed how we work and speeds up diagnosis and time critical treatments. Time is of the essence when treating someone who has had a stroke, so literally every minute counts. The Telehealth platform has the potential to make a significant contribution to improved patient outcomes after stroke, especially during late evening and overnight periods".

Dr Enda Kerr & Dr Michael McCormick

HM Government
G-Cloud
Supplier

There are many different options for hosting your Pexip Health communications platform.

Pexip Health is committed to upholding high standards of information security, privacy and transparency for its customers, partners and employees.

Higher Security Platform

We offer security-first, enterprise-grade video conferencing solutions using industry-standard encryption and security protocols to maintain privacy and security.

Cloud Hosting

The Pexip Health Private Cloud provides the data control and transparency of our self-hosted software deployment with the ease and scalability of a SaaS solution.

Hybrid Hosting

Easy-to-join meetings from any device, as well as the ability to join meetings hosted on different collaboration platforms, when invited by someone outside your company.

With the complete solution from HSL, you can give your patients the care they need, when they need it.
